DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7, 8, 11-13, 16-20, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Dietz et al.

In regard to claims 1-3, 17-19 the Dietz et al. reference discloses an “apparatus” (see Figure) comprising an “inert gas source” 18 (nitrogen), a “first coupling” 16 and “second coupling” 22 that are removably coupled at fitting 17, as claimed.

In regard to claims 4 and 20, see “pressure regulator” 19.

In regard to claims 7 and 23, inasmuch structure that is defined by a quick disconnect coupling, the connections (unlabeled) in the system meet the claimed limitation.

In regard to claims 8 and 24, see “valve” 21.

In regard to claims 11-13 and 16, the method would be inherent during normal use and operation of the device.

Allowable Subject Matter

Claims 5, 6, 9, 10, 14, 15, 21 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Evans and Andrews et al. references pertain to various gas purging corrosion coolant systems.
